

# Analytical tools and information-sharing methods supporting road safety organizations

Imad Abugessaisa

2008-04-25

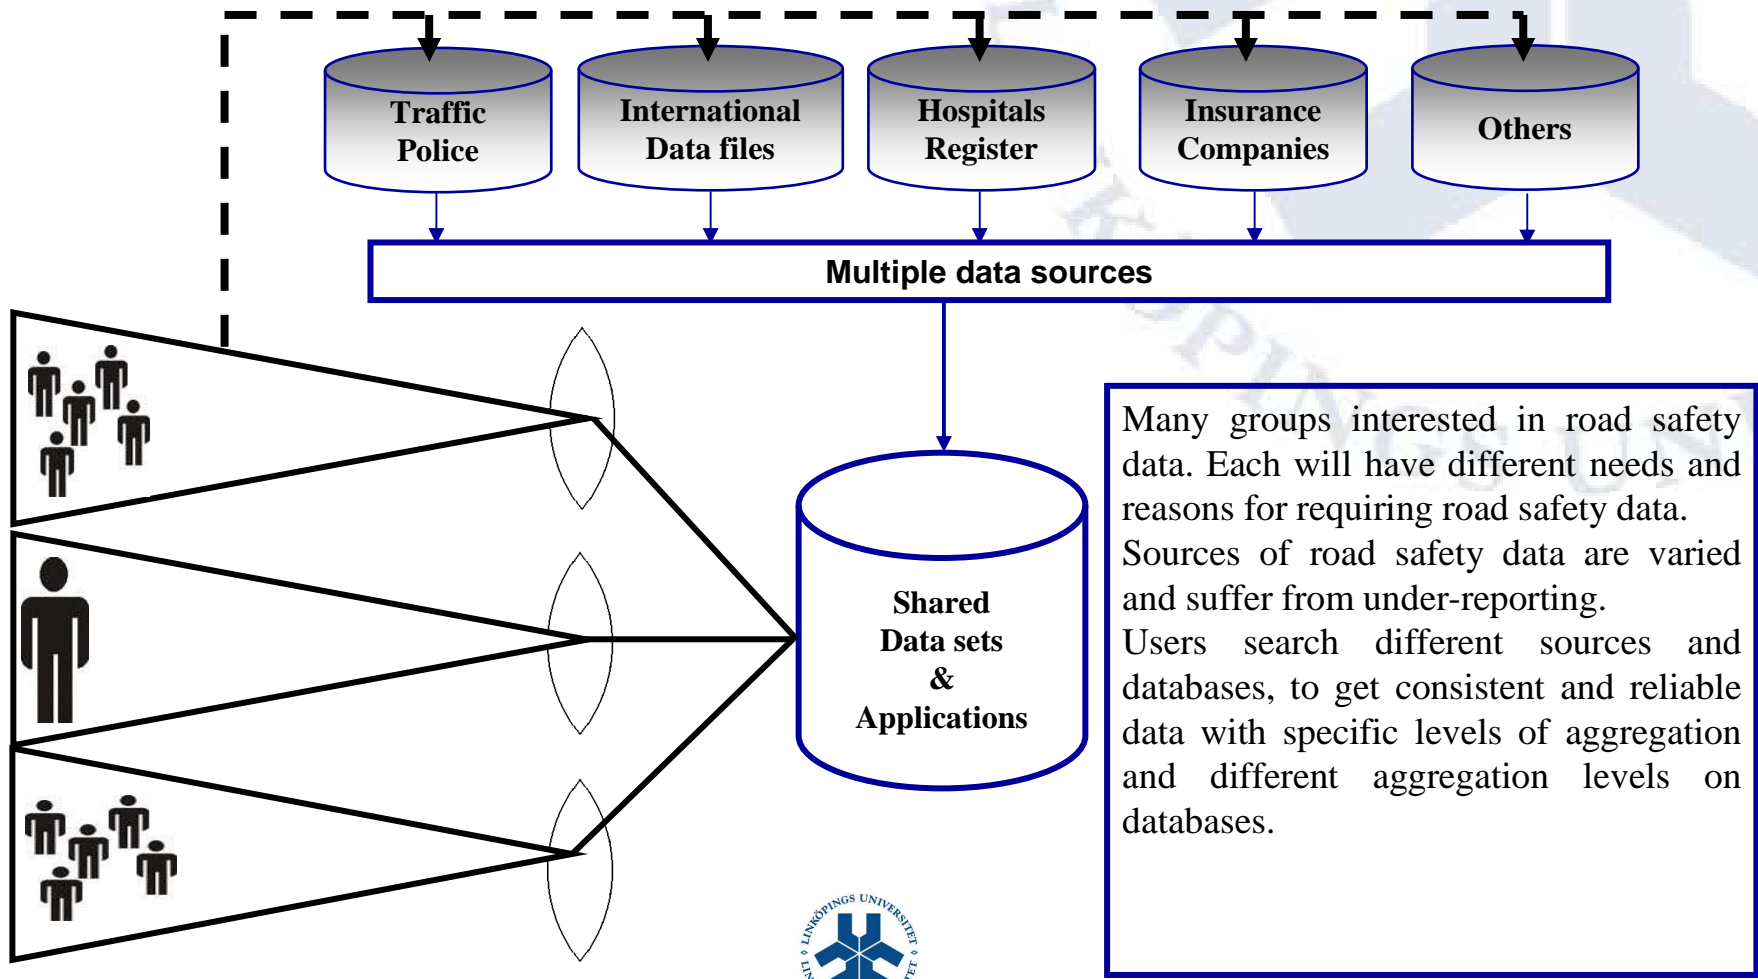

# Information need for road safety planning

- ❑ The correctness and the validity of the decision regarding traffic safety at the country depend on how well the gathered and shared information meet and compile general data quality and users needs.
- ❑ Traffic safety data needed for:
  - **Evaluation of the road safety situations.**
  - **Analysis and evaluation of safety measures.**
  - **R & D in the filed.**

# Research issues

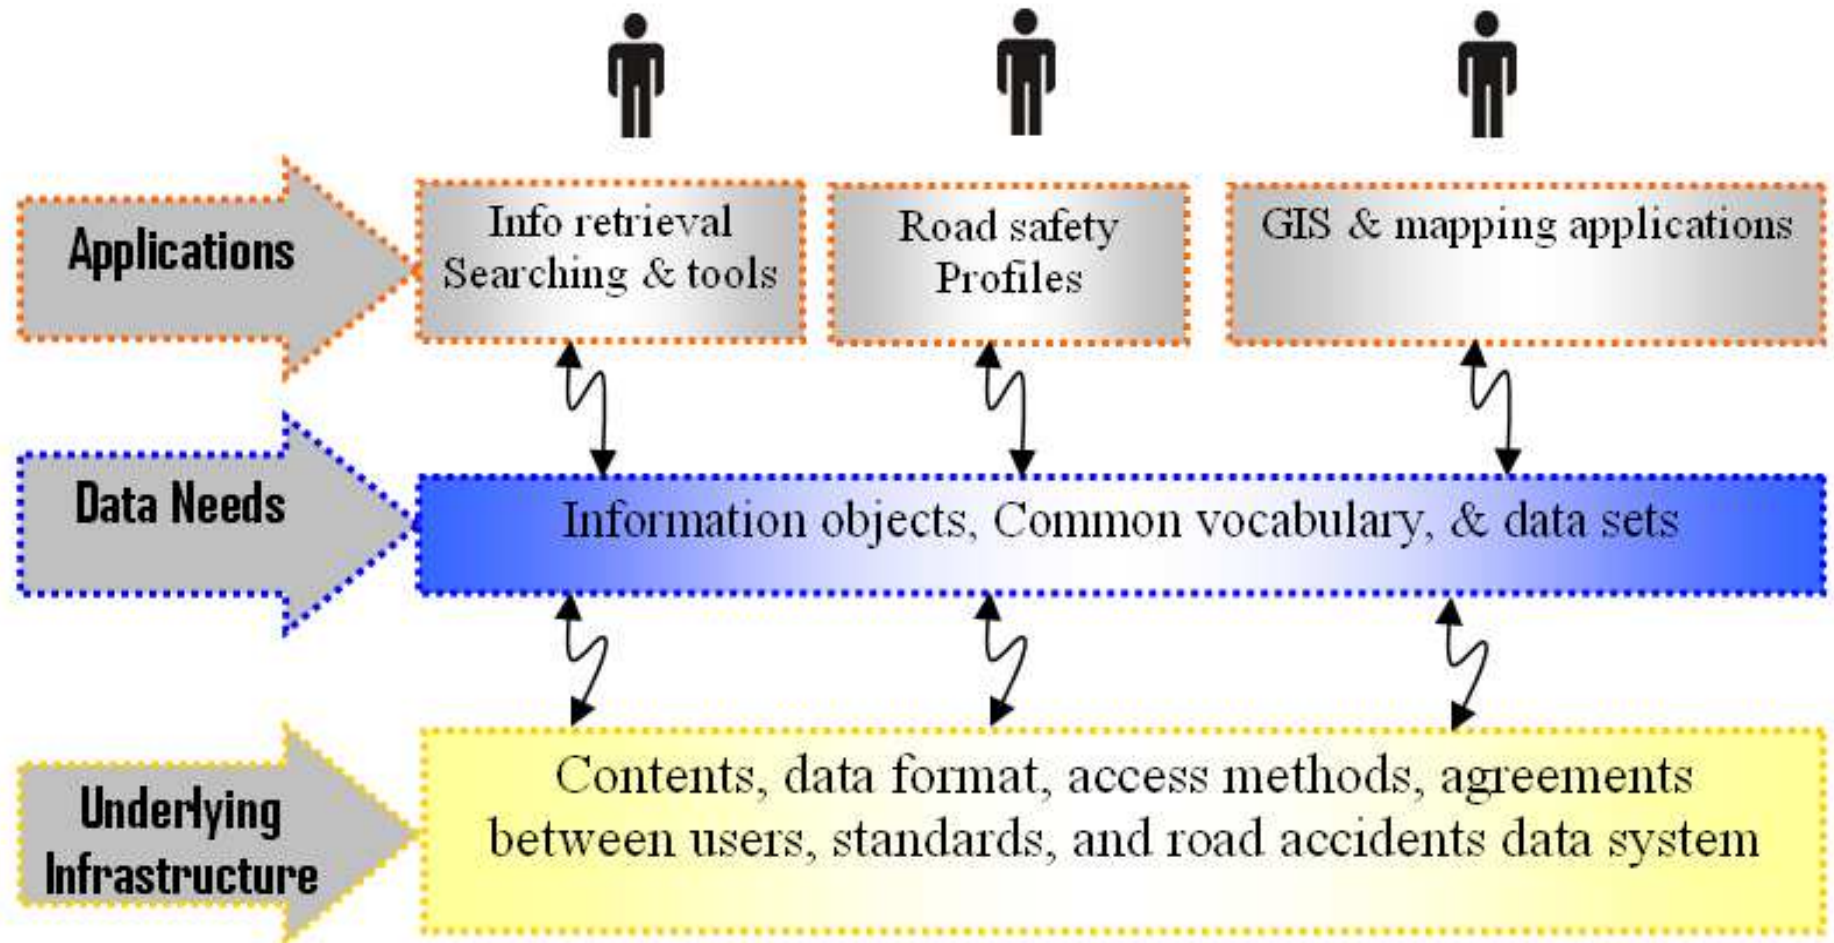

# Our contributions

- This thesis contributes to the design and implementation of a platform for information sharing among road safety organizations to support decision making and development of road safety plans.
